SHIVANI BUTOLA

Power BI Developer & Data Engineer

Pune, India | +91-7895149429 | shivanibutola94@gmail.com | linkedin.com/in/shivani-butola

PROFESSIONAL SUMMARY

Power BI Developer & Data Engineer with about 4 years of experience delivering enterprise dashboards, data models and paginated reports for financial services and media clients. Strong in DAX, Power Query, SQL and star/snowflake modeling, with hands-on data engineering in Databricks, PySpark, Azure Data Factory, Snowflake and Microsoft Fabric. Focused on data accuracy through validation, reconciliation and root cause analysis, and on turning stakeholder requirements into trusted KPIs. Experienced in running CI/CD-based releases across development, testing and production.

TECHNICAL SKILLS

- **BI & Visualization:** Power BI (dashboards, paginated reports, DAX, Power Query, data modeling), Qlik Sense, Excel Power Query
- **Data Engineering:** SQL, Python, PySpark, Databricks, Azure Data Factory, Snowflake, Microsoft Fabric, ETL/ELT pipelines, Gather360
- **Automation & DevOps:** CI/CD pipelines, Power Automate, Power Apps, Power Virtual Agent, Logic Apps
- **Data Modeling:** Star and snowflake schemas, performance tuning
- **Practices:** Data validation and reconciliation, KPI definition, root cause analysis, requirements gathering, stakeholder engagement
- **Also:** Machine Learning, Predictive Analytics

WORK EXPERIENCE

Power BI Developer & Data Engineer **Apr 2026 – Present**

Atyeti Inc, Pune (Client: M&G Global Services)

- Build and maintain interactive Power BI dashboards that track key business KPIs and monitor investment and portfolio performance.
- Develop and optimize data models, DAX measures and Power Query transformations to improve reporting accuracy and performance.
- Process, transform and prepare large datasets in Databricks using Python, PySpark and SQL for analytical reporting.
- Build and maintain ETL/ELT pipelines that integrate multiple sources into analytics-ready datasets.
- Implement CI/CD pipelines that automate code validation, deployment and release across development, testing and production; troubleshoot deployments and manage versioning and release activities.
- Perform data validation, reconciliation and root cause analysis to resolve discrepancies, and automate these checks in Python to reduce manual effort.
- Partner with business stakeholders to gather requirements, define KPIs and translate needs into scalable reporting solutions.
- Recognized by onshore clients for delivering long-overdue tasks in a short timeframe.

Power BI Developer **Jul 2023 – Oct 2025**

Auto Flow Technologies, Pune (Client: Aditya Birla Capital)

- Led the design and maintenance of Power BI dashboards tracking disbursement rates, login activity, sanction approvals and overall portfolio performance.
- Built optimized data models and advanced Power Query transformations that improved data retrieval speed and accuracy.
- Developed print-ready paginated reports for business users across departments.
- Automated data integration and error tracking with Python.
- Analyzed data to identify trends and support strategic initiatives; diagnosed and resolved discrepancies through root cause analysis.
- Gathered requirements from stakeholders and translated them into reporting solutions aligned with business goals.
- Introduced a new dashboard that reduced reporting time and improved stakeholder satisfaction.

- Added data quality checks and validation to the reporting framework, improving data accuracy.
- Received the UDAAN Award in 2023 and 2024 for leading key initiatives on the FINVERSE project, and an Appreciation Award in 2024 for contributions to data visualization and analytics.

Power BI Developer **Jun 2022 – Jul 2023**

SPEC India Pvt. Ltd., Ahmedabad (Client: Irish Times)

- Developed Power BI dashboards integrating SQL Server, Excel and other sources to deliver business insights.
- Tuned report performance and refined data models, improving load times and user experience.
- Used Azure Data Factory, Gather360, Logic Apps, Power Automate and Power Apps to build scalable, data-driven solutions.
- Automated data collection with Python scripts.
- Presented findings to clients and carried out R&D to meet varied client requirements.
- Earned senior management commendations for high-impact analytics projects and ranked among top company-wide performers, with a cash award.

KEY PROJECTS

- **Portfolio & Disbursement Monitoring (Aditya Birla Capital):** Real-time Power BI dashboards for disbursement, sanction and login activity from multiple integrated sources, plus paginated reports aligned to business reporting cycles.
- **Multi-Channel Sales Analysis (Irish Times):** YTD, MTD, QTD and weekly sales reports across online, offline and social channels, used by leadership for strategic decisions.
- **Inventory Management & Forecasting (Welspun):** Power BI dashboards on SQL Server data to manage stock levels and forecast inventory trends, using ABC and XYZ analysis for stock classification.

EDUCATION

B.Tech, Computer Science & Engineering – Institute of Technology, Gopeshwar, Uttarakhand 2017 – 2020

Diploma, Computer Science & Engineering – Govt. Polytechnic College, Ratura, Uttarakhand 2014 – 2017
